Education

Bachelor's of Technology in Computer Science Aug '25 - May '26

Pittsburg State University | Pittsburg, Kansas, USA

Exchange Student | CGPA: 3.4

Bachelor's of Technology in Computer Science Sep '22 - Aug '25

Malla Reddy University | Hyderabad, Telangana, India

Completed first three years of undergraduate coursework in Computer Science prior to exchange program

Experience

Vice President Sep '25 - Present

Data Analytics Club - Pittsburg State University | Pittsburg, Kansas, India

- Led weekly and monthly **technical sessions** for 10+ members on Artificial Intelligence, cloud computing, and modern software development topics
- Coordinated peer-led workshops and discussions for 10+ members, increasing **cross-domain collaboration** by 20%

Co-Founder & Lead Software Engineer Jun '24 - Jul '25

EventAura | Hyderabad, Telangana

- Built and deployed** a full-stack event platform using React, Node.js, and Express, hosted on Google Cloud Platform for **scalability** and **performance**
- Optimized infrastructure** through caching and cost-efficient configurations, reduced server costs by 8%, and driving **\$6,000+** in revenue

Software Developer Mentor May '24 - Aug '24

GirlScript Summer Of Code | Remote

- Mentored and led** a team of 10+ students in full-stack development, providing structured guidance on **Git**, **containerization**, and **debugging** practices
- Improved team coding proficiency by 10%** through code reviews, pair programming, and project-based learning

React Intern May '24 - Aug '24

InfraBIM Techno Solutions | Hyderabad, Telangana

- Developed and deployed a React.js dashboard** using **Redux** for real-time data visualization and state management.
- Optimized front-end performance**, reducing **API calls by 5%** through efficient state handling and caching strategies.

Skills

Programming Languages: Javascript, Python, Java

Libraries/Frameworks: React, Next.js, Node.js, Express.js, FastAPI, Django, pytest, LangChain

Cloud & DevOps: Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure, Docker, GitHub Actions

Databases & Distributed Systems: PostgreSQL, MySQL, MongoDB, RabbitMQ, Redis, Selenium (Python)

Projects / Open-Source

EventAura

Technologies Used: ReactJS, Express, MongoDB, Docker, Google Cloud Platform

- Developed and deployed** a full-stack event management platform using React, NodeJS, and Express, integrating Clerk authentication for secure access for 1000+ users
- Optimized GCP infrastructure** with **Docker** containers and **CI/CD pipelines**, increasing deployment efficiency by ~7% and improving scalability for 100+ active users

Intelligent Nutrition Recommendation System

Tech Stack: Python (FastAPI), LangChain, Google Generative AI (Gemini), Docker, USDA FoodData Central, GitHub Actions

- Designed and deployed a two-stage AI inference pipeline processing **30+ nutrient attributes** across **thousands of food items**, integrating natural language parsing with model-based ranking
- Containerized** and exposed FastAPI inference services via Representational State Transfer (REST) APIs, enabling orchestration of scoring, ranking, and structured meal-plan generation

Certifications

- Artificial Intelligence (AI) - [IBM](#)
- Introduction to Programming Using Python - [Coursera](#)
- Python Data Structures - [Coursera](#)
